ABOUT CROUZET MOTORS

All around the world for more than 50 years, Crouzet Motors has been providing an innovative engineering expertise, high quality service and a complete offer of standard and customized direct drives, geared motors and motion control solutions for all applications where performance is a key issue.

Crouzet Motors is a brand of InnoVista Sensors™.

With a long-term commitment to technological excellence, the engineering teams have mastered the following core technologies and know-how:

- › Electromagnetism
- › Thermal dynamics
- › Electromechanical systems
- › Electronic drives

Covering the power range from 1 to 1000 W peak (1/100 to 1HP+) and available with spur, worm or planetary gearboxes, plus adapted controllers, our offer is specifically designed for access control systems, pumps and valves, railway applications, electrical equipment, medical equipment and the industry.

InnoVista Sensors™: your trusted partner of choice to face industrial challenges of today and tomorrow.

InnoVista Sensors™ is a worldwide industrial specialist of sensors, controllers and actuators for automated systems.

Through its brands, Crouzet Aerospace, Crouzet Automation, Crouzet Control, Crouzet Motors, Crouzet Switches and Systron Donner Inertial, InnoVista Sensors™ offers a wide range of reliable, efficient and customizable components dedicated to the Aerospace & Defense, Transportation and Industrial market and segments.

Thanks to the recognized expertise of its teams and a strong innovation policy, InnoVista Sensors™ brings performance enhancing solutions to its customers worldwide.

ADAPTATION WHEEL

To meet market expectations and provide customers with the right solutions within the shortest timeframes, Crouzet Motors has structured its processes around the different types of product available: standard products, adapted products or products specially developed for a customer.

Introducing the adaptation wheel...

1 STANDARD PRODUCTS

Sales service

A full range of motors, geared motors and associated controllers. You can create your automation control applications as quickly as possible

2 PRODUCTS WITH ADDED VALUE

Customer Adaptation Centre

All our standard products can have additional factory-mounted auxiliaries or accessories: connectors, leads, special terminals, customized shafts, adaptor plates, etc. Seamless integration in your equipment means you benefit from simpler logistics and optimum installation reliability.

3 ADAPTED PRODUCTS

Customer Adaptation Centre

Defined in coordination between your project teams and our specialists, these adapted products have exactly the right levels of performance and functionality you need for your applications.

4 SPECIAL PRODUCTS

Engineers and teams Dedicated project

From the very start of a project, Crouzet Motors' experts work closely with your teams to develop the specification. All our design, industrialization and approval expertise goes into developing Motion Control solutions that are tailored to your requirements.

DCmind BRUSH

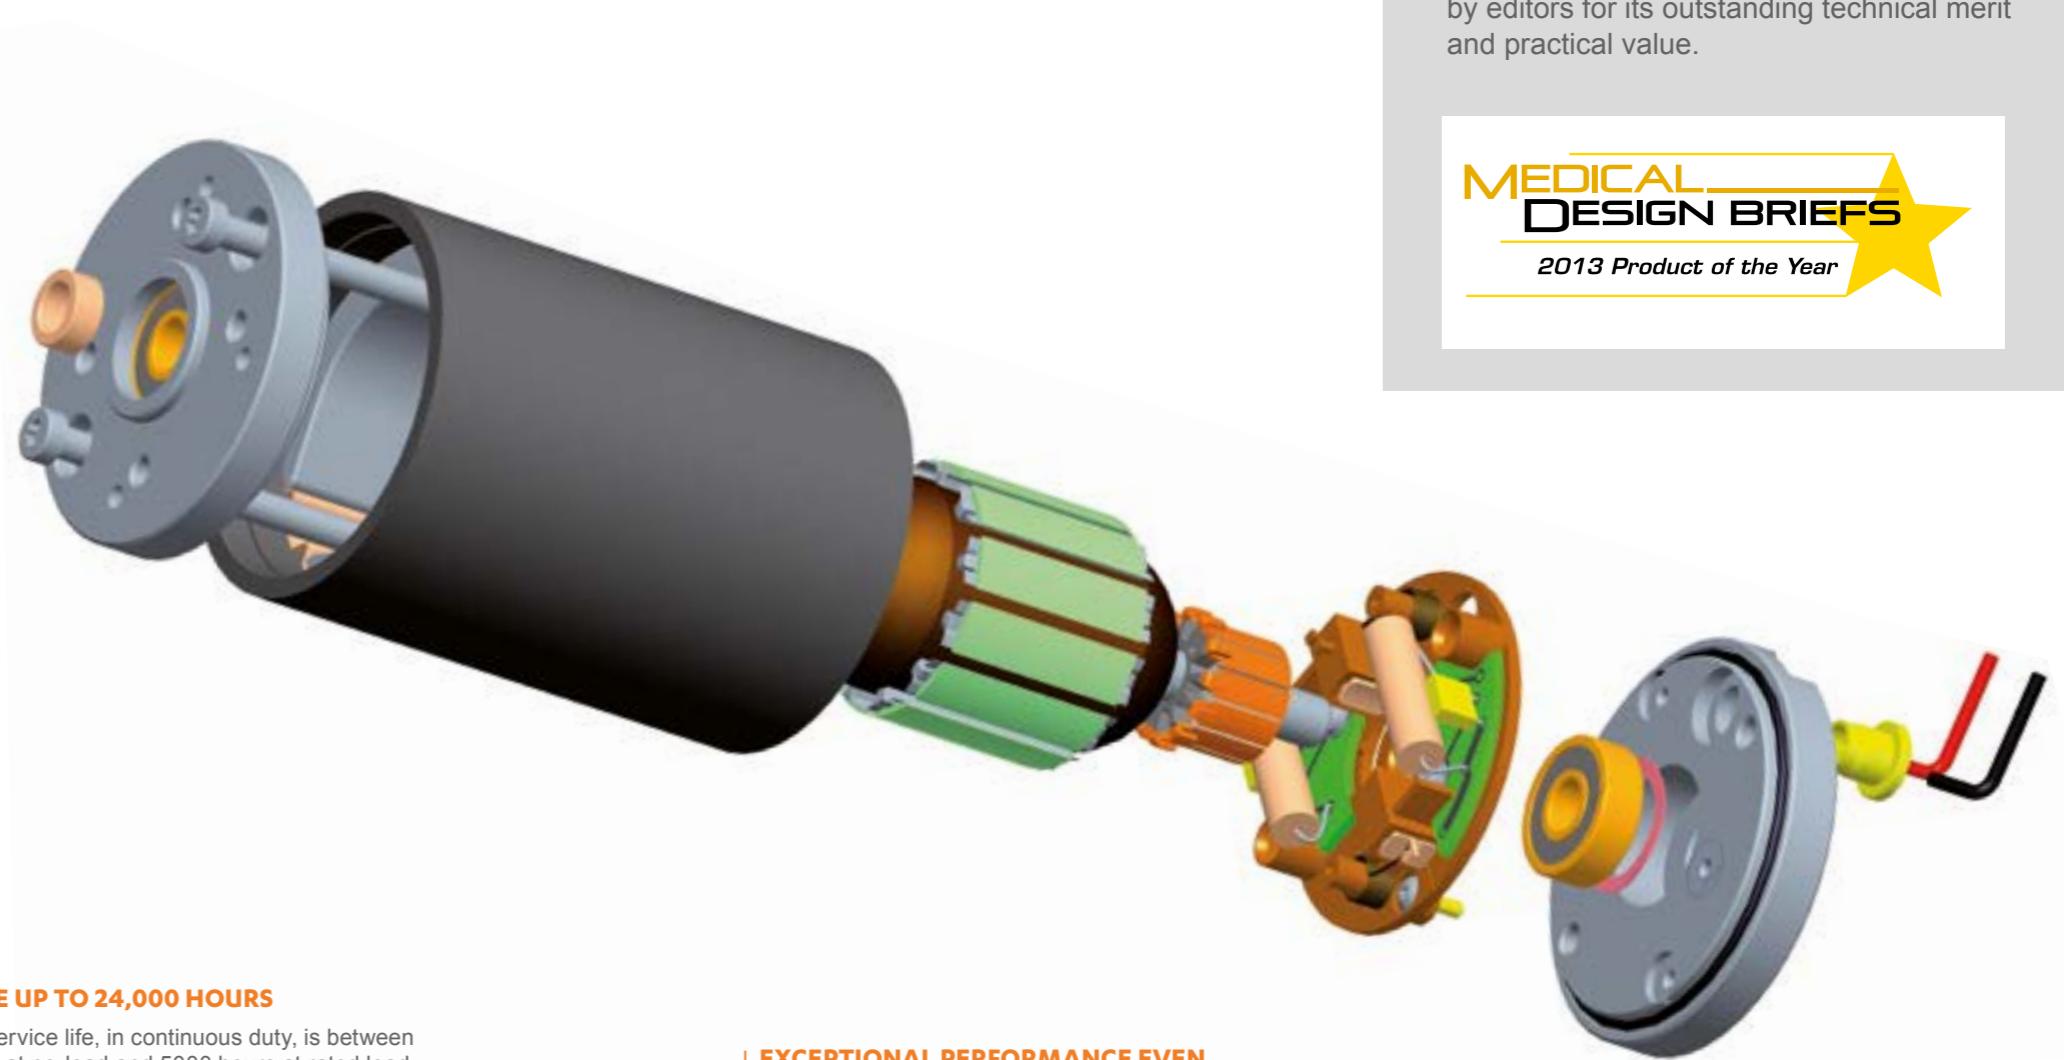

THE QUIETEST ON THE MARKET

With more than 50 years' experience, Crouzet Motors, a specialist in customized Motion Solutions, presents its DCmind Brush range of direct current Brush motors.

Designed by the engineers in Crouzet Motors, this range - the quietest on the market - is ideally suited to the medical, industrial and commercial equipment sectors.

PRODUCT BENEFITS:

- › Exceptionally quiet: 35 dBA
- › Service life up to 24,000 hours
- › More than 80% efficiency
- › Output power up to 104 W
- › 12, 24, 48, 90 and 120 V_{DC} power supplies and other voltages on request
- › Up to IP69K
- › Conformity to the specific standards for your market and required approvals

EXCEPTIONALLY QUIET

Systematic approach to eliminate noise

- › At source
- › From transmission
- › From dispersion

Innovative design

- › Choice of new materials
- › Optimization of component assembly (centering, perpendicularity, parallelism, etc.)

A range of gearbox

- › In line with high performance motor

SERVICE LIFE UP TO 24,000 HOURS

- › Its average service life, in continuous duty, is between 24,000 hours at no-load and 5000 hours at rated load

MORE THAN 80% EFFICIENCY

- High performance magnetic circuit
- › Optimum magnetic flux
- › Magnets designed to optimize the detent torque

Optimal electromagnetic performance

- › Energy losses on the winding
- › Magnetic losses
- › Minimal friction

The Crouzet DCmind Brush Motor Series has earned the honor of 2013 Readers' Choice **Product of the Year** Winner by Medical Design Briefs magazine. Every year the editors of the magazine review new products and choose the best of the best for voting by their readership in the annual awards competition. The Crouzet DCmind Brush Motor Series was chosen by editors for its outstanding technical merit and practical value.

EXCEPTIONAL PERFORMANCE EVEN IN SEVERE ENVIRONMENTS

IP65 as standard

- › Front and rear end caps redesigned to ensure a good seal, including wire exits
- › IP 67 on request
- › IP 69K on request

Approvals and conformities

- › UL 1004 - CE - ROHS
- › Medical (IEC 60601-1)
- › Office automation (IEC 60950)
- › Household appliances (IEC 60335)

DCmind BRUSH: ECO-DESIGN

Crouzet Motors has been involved in eco-design for many years (ISO 14001 held since 1997).

Its production plants have some of the lowest existing impacts on the environment, and in addition, all Crouzet Motors's product developments are constantly reducing their footprint on ecosystems.

The DCmind Brush motors range reduces this footprint to a third of more conventional manufacturing techniques.

ECOLOGICAL FOOTPRINT ON NATURAL ENVIRONMENTS:

Throughout a product's service life, from design through to the recycling stage, every manufactured product has an impact on ecosystems.

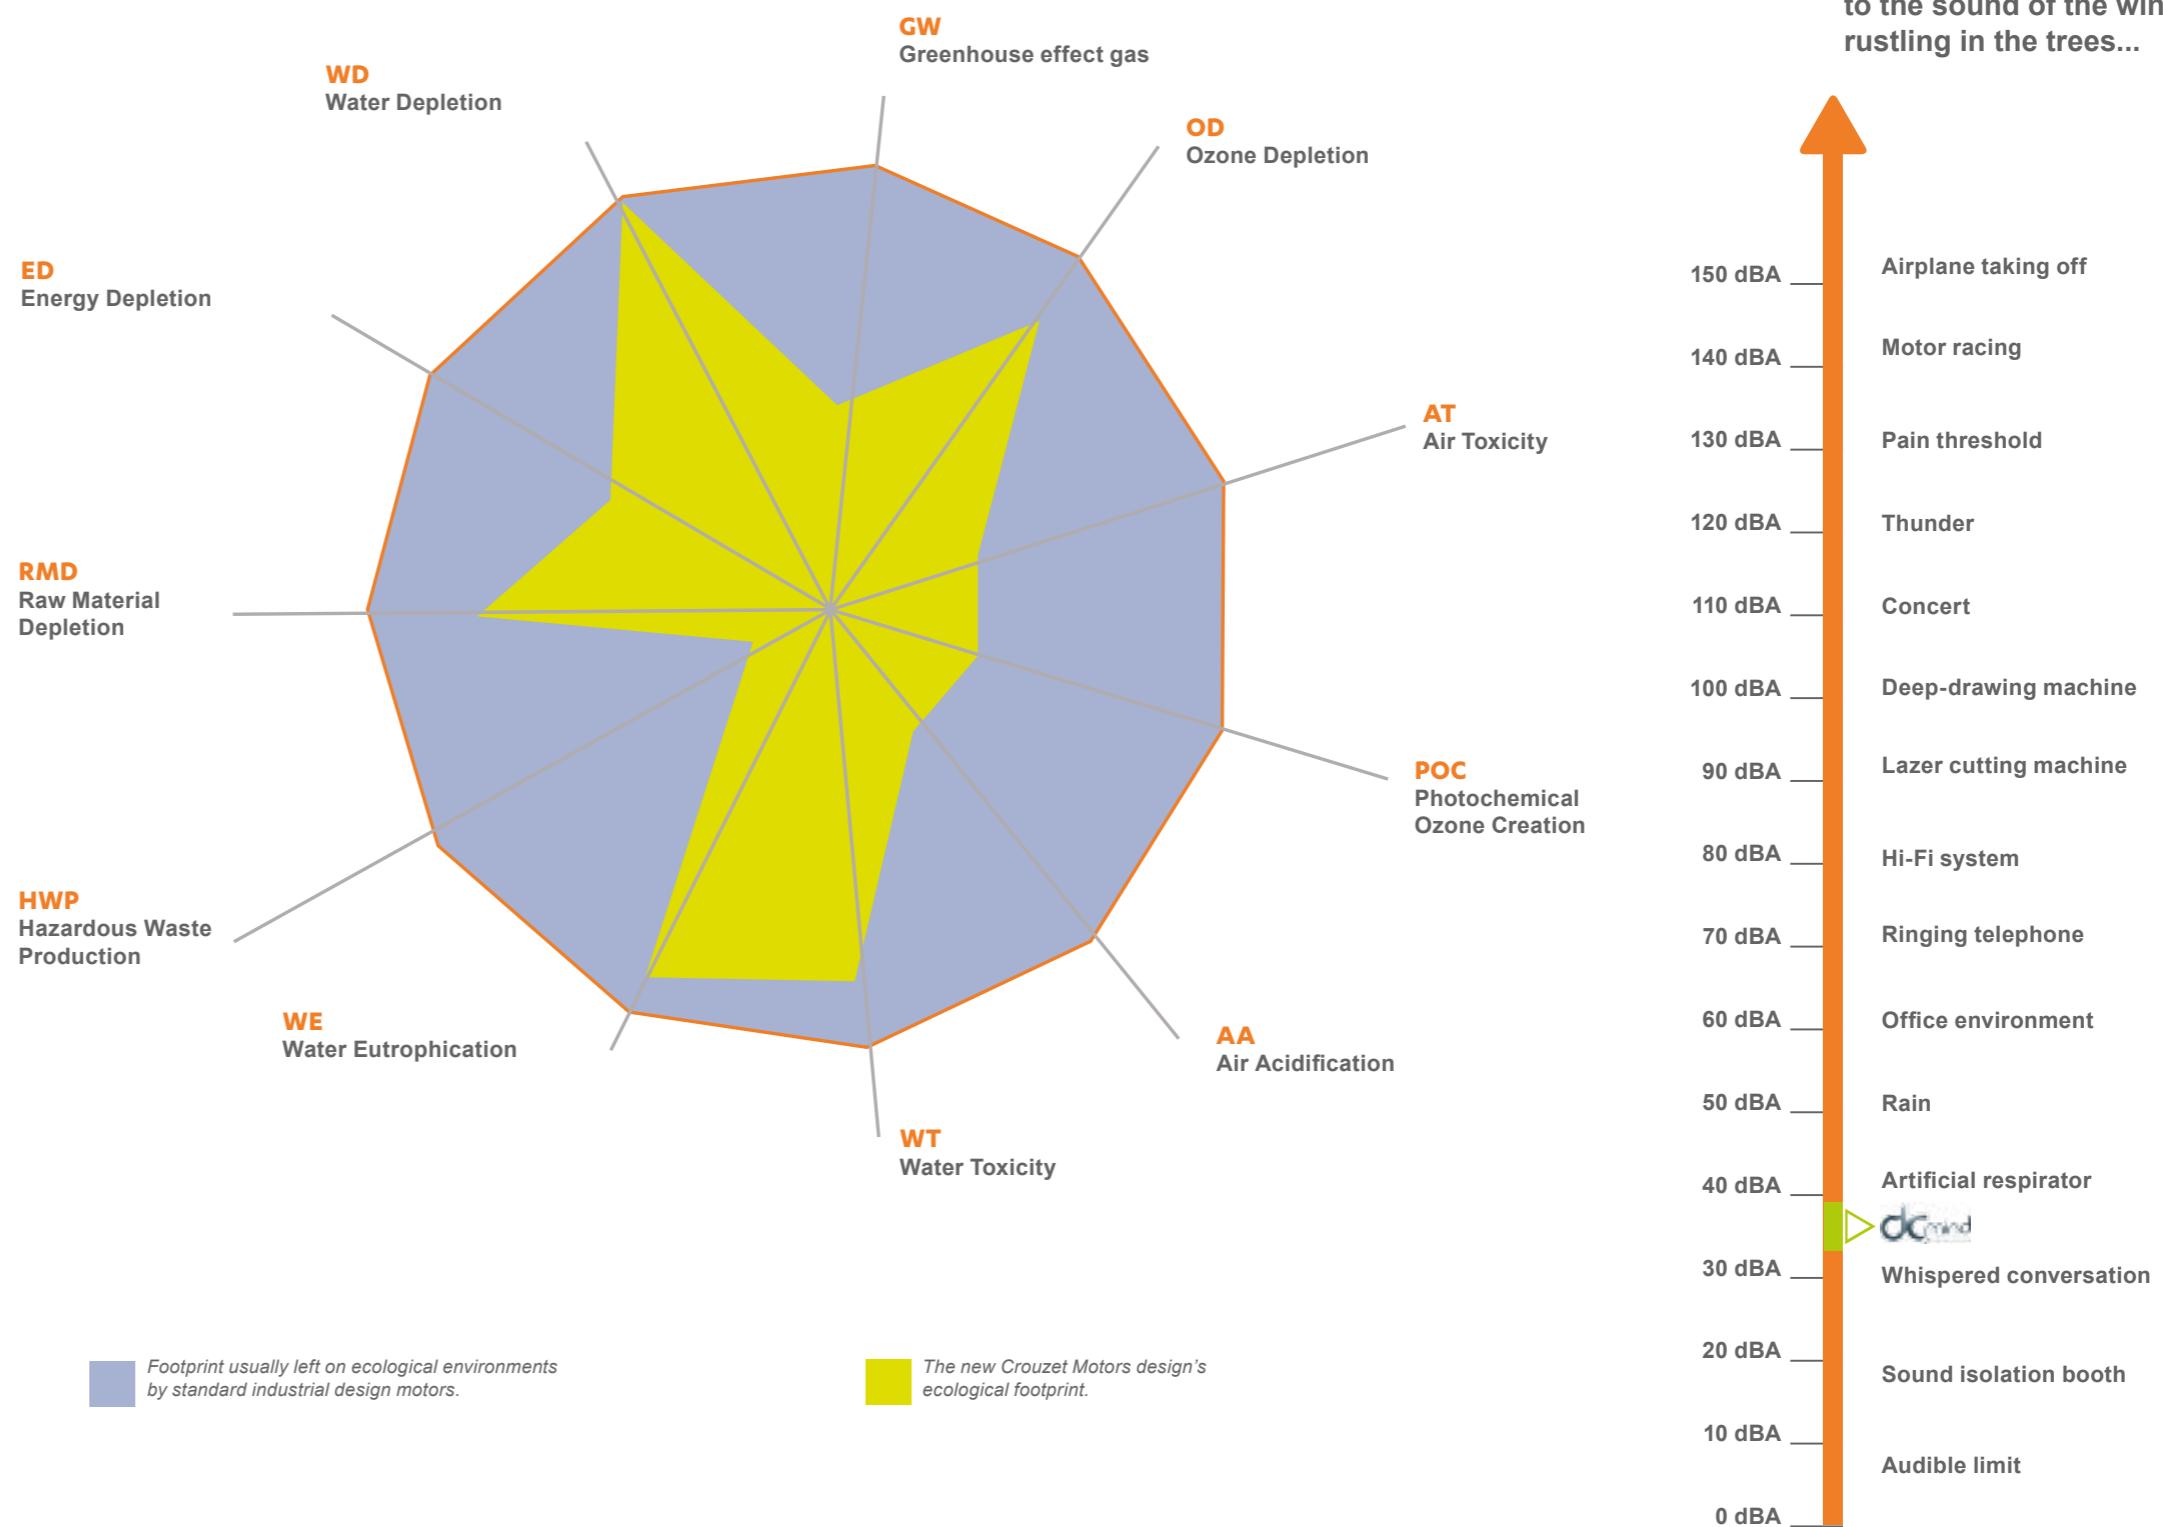

Reducing this footprint is a priority for any company that cares about the environment.

The diagram opposite compares the footprint of a conventional design with the new design.

NOISE LEVEL:

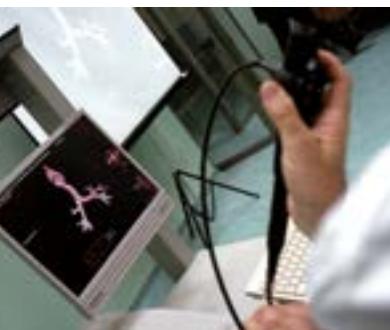

A noise level comparable to the sound of the wind rustling in the trees...

DCmind BRUSH: SELECTION GUIDE

To complement the current range from Crouzet Motors, the latest generation of DC Brush direct drive and geared motors have been precision engineered to minimise all mechanical and electro-mechanical variations.

Extremely quiet, this range is ideally suited to medical and laboratory applications.

ACCESSORIES AND ADAPTATIONS

- › Rear Friction Brake
- › 1,000 Pulse 2-Channel Encoder
- › Connectors
- › Voltage, speed, power
- › Shaft dimensions and material
- › Motor length
- › Other ratios and gearboxes
- › Etc.

NEW ADAPTATION POSSIBILITIES

- › Railway application (compliance with fire/smoke regulations)
- › Isolation for use at 230 V
- › Other colours

DCmind: DC DIRECT-DRIVE BRUSH MOTORS

Ø 42 mm - 20 W

- › Silent motor
- › 12 V and 24 V built in EMC filter class B
- › Excellent efficiency
- › Long life
- › IP65
- › In accordance with UL - CE - ROHS regulations

89830 IP65 / Holding brake / Encoder			
89890 IP65 / Holding brake / Encoder			
General characteristics			
Number of stages	1 2 3	1 2 3	1
Maximum permitted torque (Nm)	3 7.5 15	4 12 25	10
Efficiency	0.8 0.75 0.7	0.8 0.75 0.7	0.6 → 0.3
Axial dynamic load (daN)	5 8 11	6 10 15	10
Radial dynamic load (daN)	16 23 30	20 32 45	15
Weight (kg)	0.3 0.4 0.5	0.7 0.9 1.1	0.6
Standard reduction ratios	9 45 302	7-9 28-45 302	5 - 10 - 20 - 30 - 50
Other ratios possible	58 - 137 - 232 - 393	58 - 137 - 192 - 232 - 393	15 - 100
Operating temperature	-30 → +70°C	-30 → +70°C	-10 → +75°C
Typical noise level	45 dBA	45 dBA	45 dBA
Comments			
Planetary gearboxes:			

To maintain a very low noise level, the motor pinion is precision machined on motor shaft to obtain optimum concentricity and parallelism. The gears in the first stage are helical-cut and made from a composite material. This design significantly improves gear life by reducing wear due to friction, increases gearbox efficiency and ensures a very low noise level even with the gearbox under load.

Worm gearbox:

This gearbox combines a tempered steel worm gear with a hardened bronze helical wheel, a combination that ensures a long service life. The helical wheel rotates in a grease reservoir to provide an excellent slip coefficient and dissipate heat. O-rings and lip seals equipped with garter springs are used to ensure sealing the gearbox output shaft.

The gearbox casing is made of aluminium to maximize heat dissipation.

However, because of the high power rating of this gearbox and the lower efficiency inherent in ratio worm gearboxes, care must be taken not to exceed a temperature of 75°C on the gearbox casing during operation.

The output shaft configuration can be right, left, or a dual shaft (shaft output on both sides).
